Data Interpretation

1. Tables – Data Interpretation

Study the following table showing the number of units sold by four companies over three months.

Company	January	February	March
A	120	150	180
B	100	140	160
C	80	120	200
D	150	130	170

Q1. What is the total number of units sold by all four companies in February?

A) 520

B) 530

C) 540

D) 550

Q2. What is the percentage increase in sales of Company A from January to March?

A) 40%

B) 45%

C) 50%

D) 60%

Q3. What is the difference between the total sales of Company C and Company D over all three months?

A) 40
B) 50
C) 60
D) 70

Q4. What is the average monthly sales of Company B?

A) 125

B) 130

C) 133.33

D) 140

Q5. Find the ratio of total sales of all companies in January to total sales in March.

A) 45 : 71

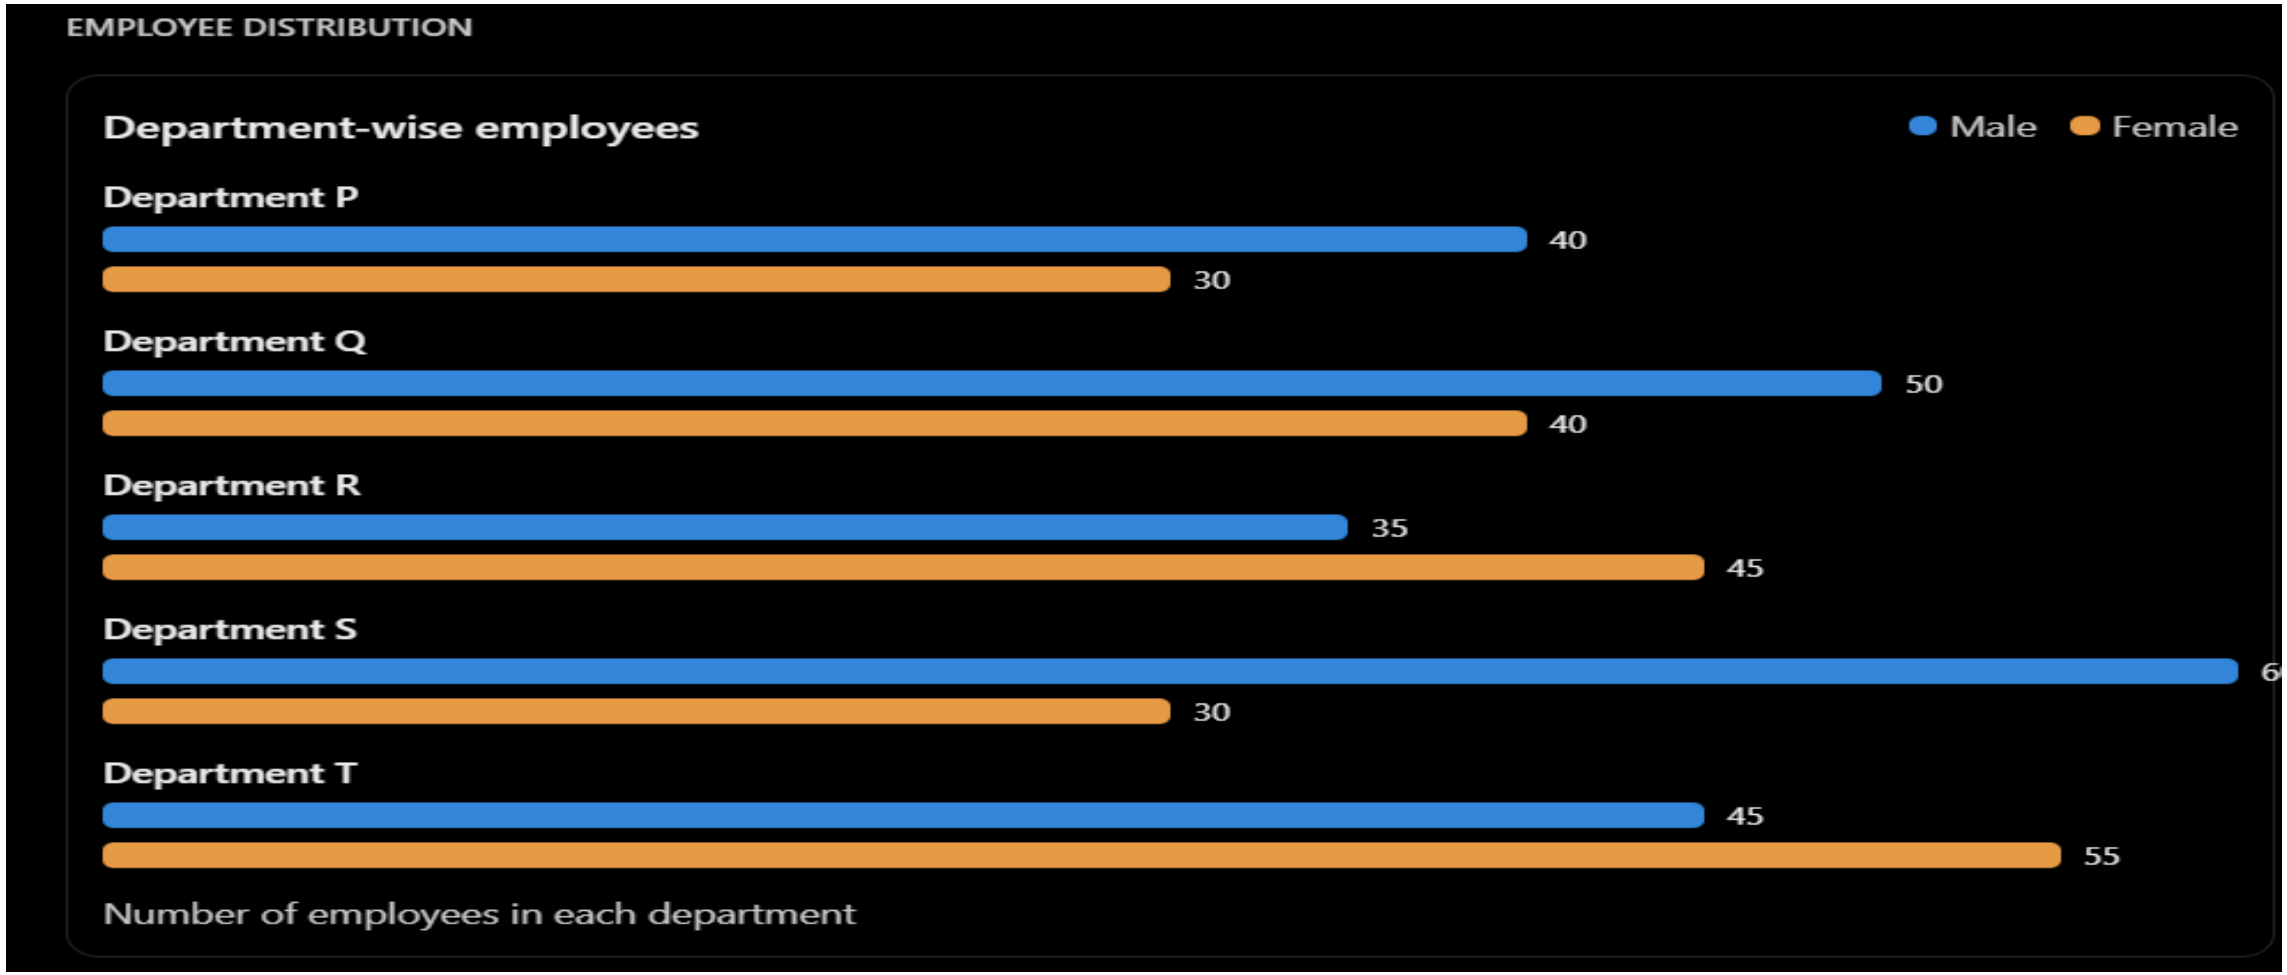

B) 45 : 70

C) 50 : 71

D) 45 : 65

2. Bar Graphs – Data Interpretation

The following bar graph represents the number of male and female employees in five departments of a company.

Q1. Which department has the highest total number of employees?

A) Department P

B) Department Q

C) Department S

D) Department T

Q2. What is the total number of female employees across all five departments?

A) 190

B) 195

C) 200

D) 210

Q3. What is the percentage of male employees in the total workforce?

A) 50.53%

B) 52.33%

C) 53.49%

D) 55.25%

Q4. What is the ratio of male to female employees in Department R?

A) 7 : 8

B) 7 : 9

C) 8 : 9

D) 9 : 7

Q5. If 20% of the male employees in Department S leave the company and 10 new female employees join, what will be the new total workforce?

A) 428

B) 430

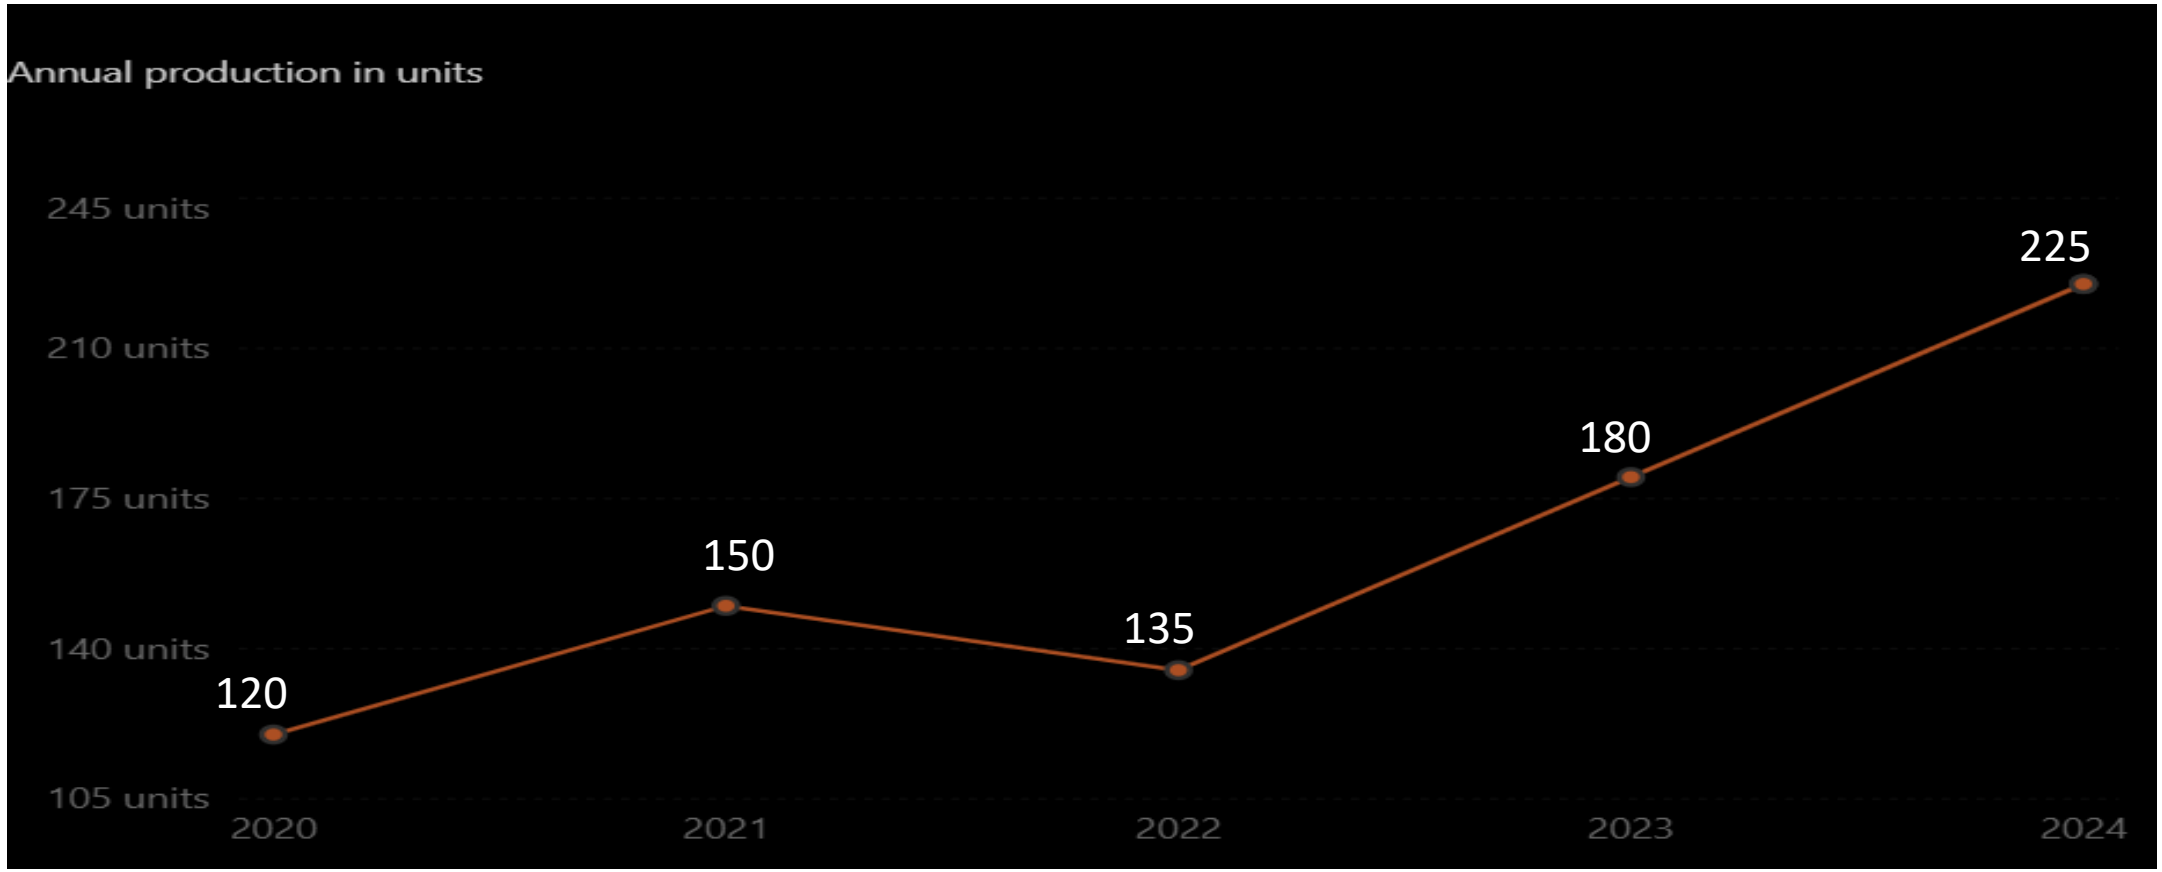

C) 432

D) 440

3. Line Graphs – Data Interpretation

The following data represents the annual production of a manufacturing company from 2020 to 2024.
ANNUAL PRODUCTION

780 units
Total production from 2020 to 2024

Q1. What is the percentage increase in production from 2020 to 2024?

A) 75%

B) 80%

C) 87.5%

D) 90%

Q2. What is the percentage decrease in production from 2021 to 2022?

A) 8%

B) 10%

C) 12%

D) 15%

Q3. What is the average annual production over the five years?

A) 150 units

B) 170 units

C) 160 units

D) 162 units

Q4. During which consecutive years did the company record the greatest increase in production?

A) 2020–2021 only

B) 2021–2022

C) 2022–2023 and 2023–2024

D) 2020–2021 and 2023–2024

Q5. What is the difference between the combined production of 2020, 2021 and 2022 and the combined production of 2023 and 2024?

A) 0 units

B) 15 units

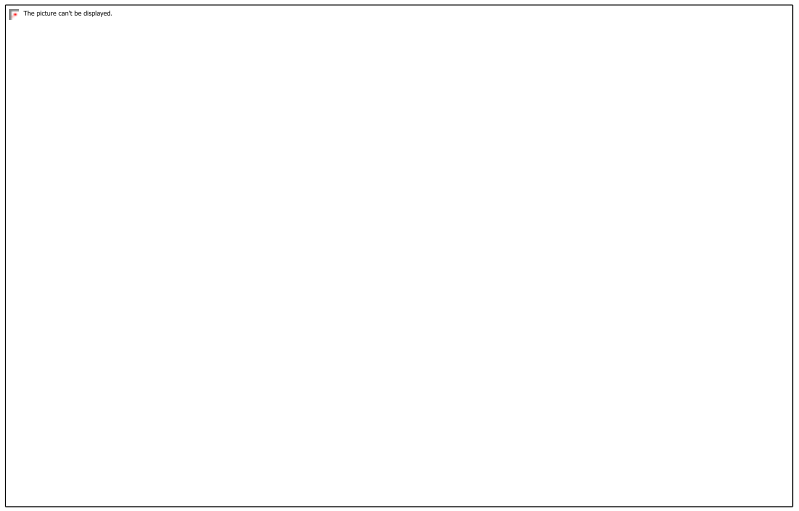

C) 30 units

D) 45 units

4. Pie Charts – Data Interpretation

The following pie chart represents the monthly expenditure of a family.
MONTHLY FAMILY BUDGET

₹40,000
Total monthly budget

Rent: 30%
Food: 25%
Travel: 15%
Savings: 20%
Others: 10%

Q1. How much money is spent on rent every month?

A) ₹10,000

B) ₹11,000

C) ₹12,000

D) ₹15,000

Q2. What is the combined expenditure on food and travel?

A) ₹14,000

B) ₹15,000

C) ₹16,000

D) ₹18,000

Q3. What is the difference between savings and expenditure on others?

A) ₹2,000
B) ₹3,000
C) ₹4,000
D) ₹5,000

Q4. What is the ratio of rent expenditure to savings?

A) 2 : 3

B) 3 : 2

C) 5 : 3

D) 4 : 3

Q5. If travel expenditure increases by 20% while all other expenditures remain unchanged, what is the percentage increase in the family's total monthly budget?

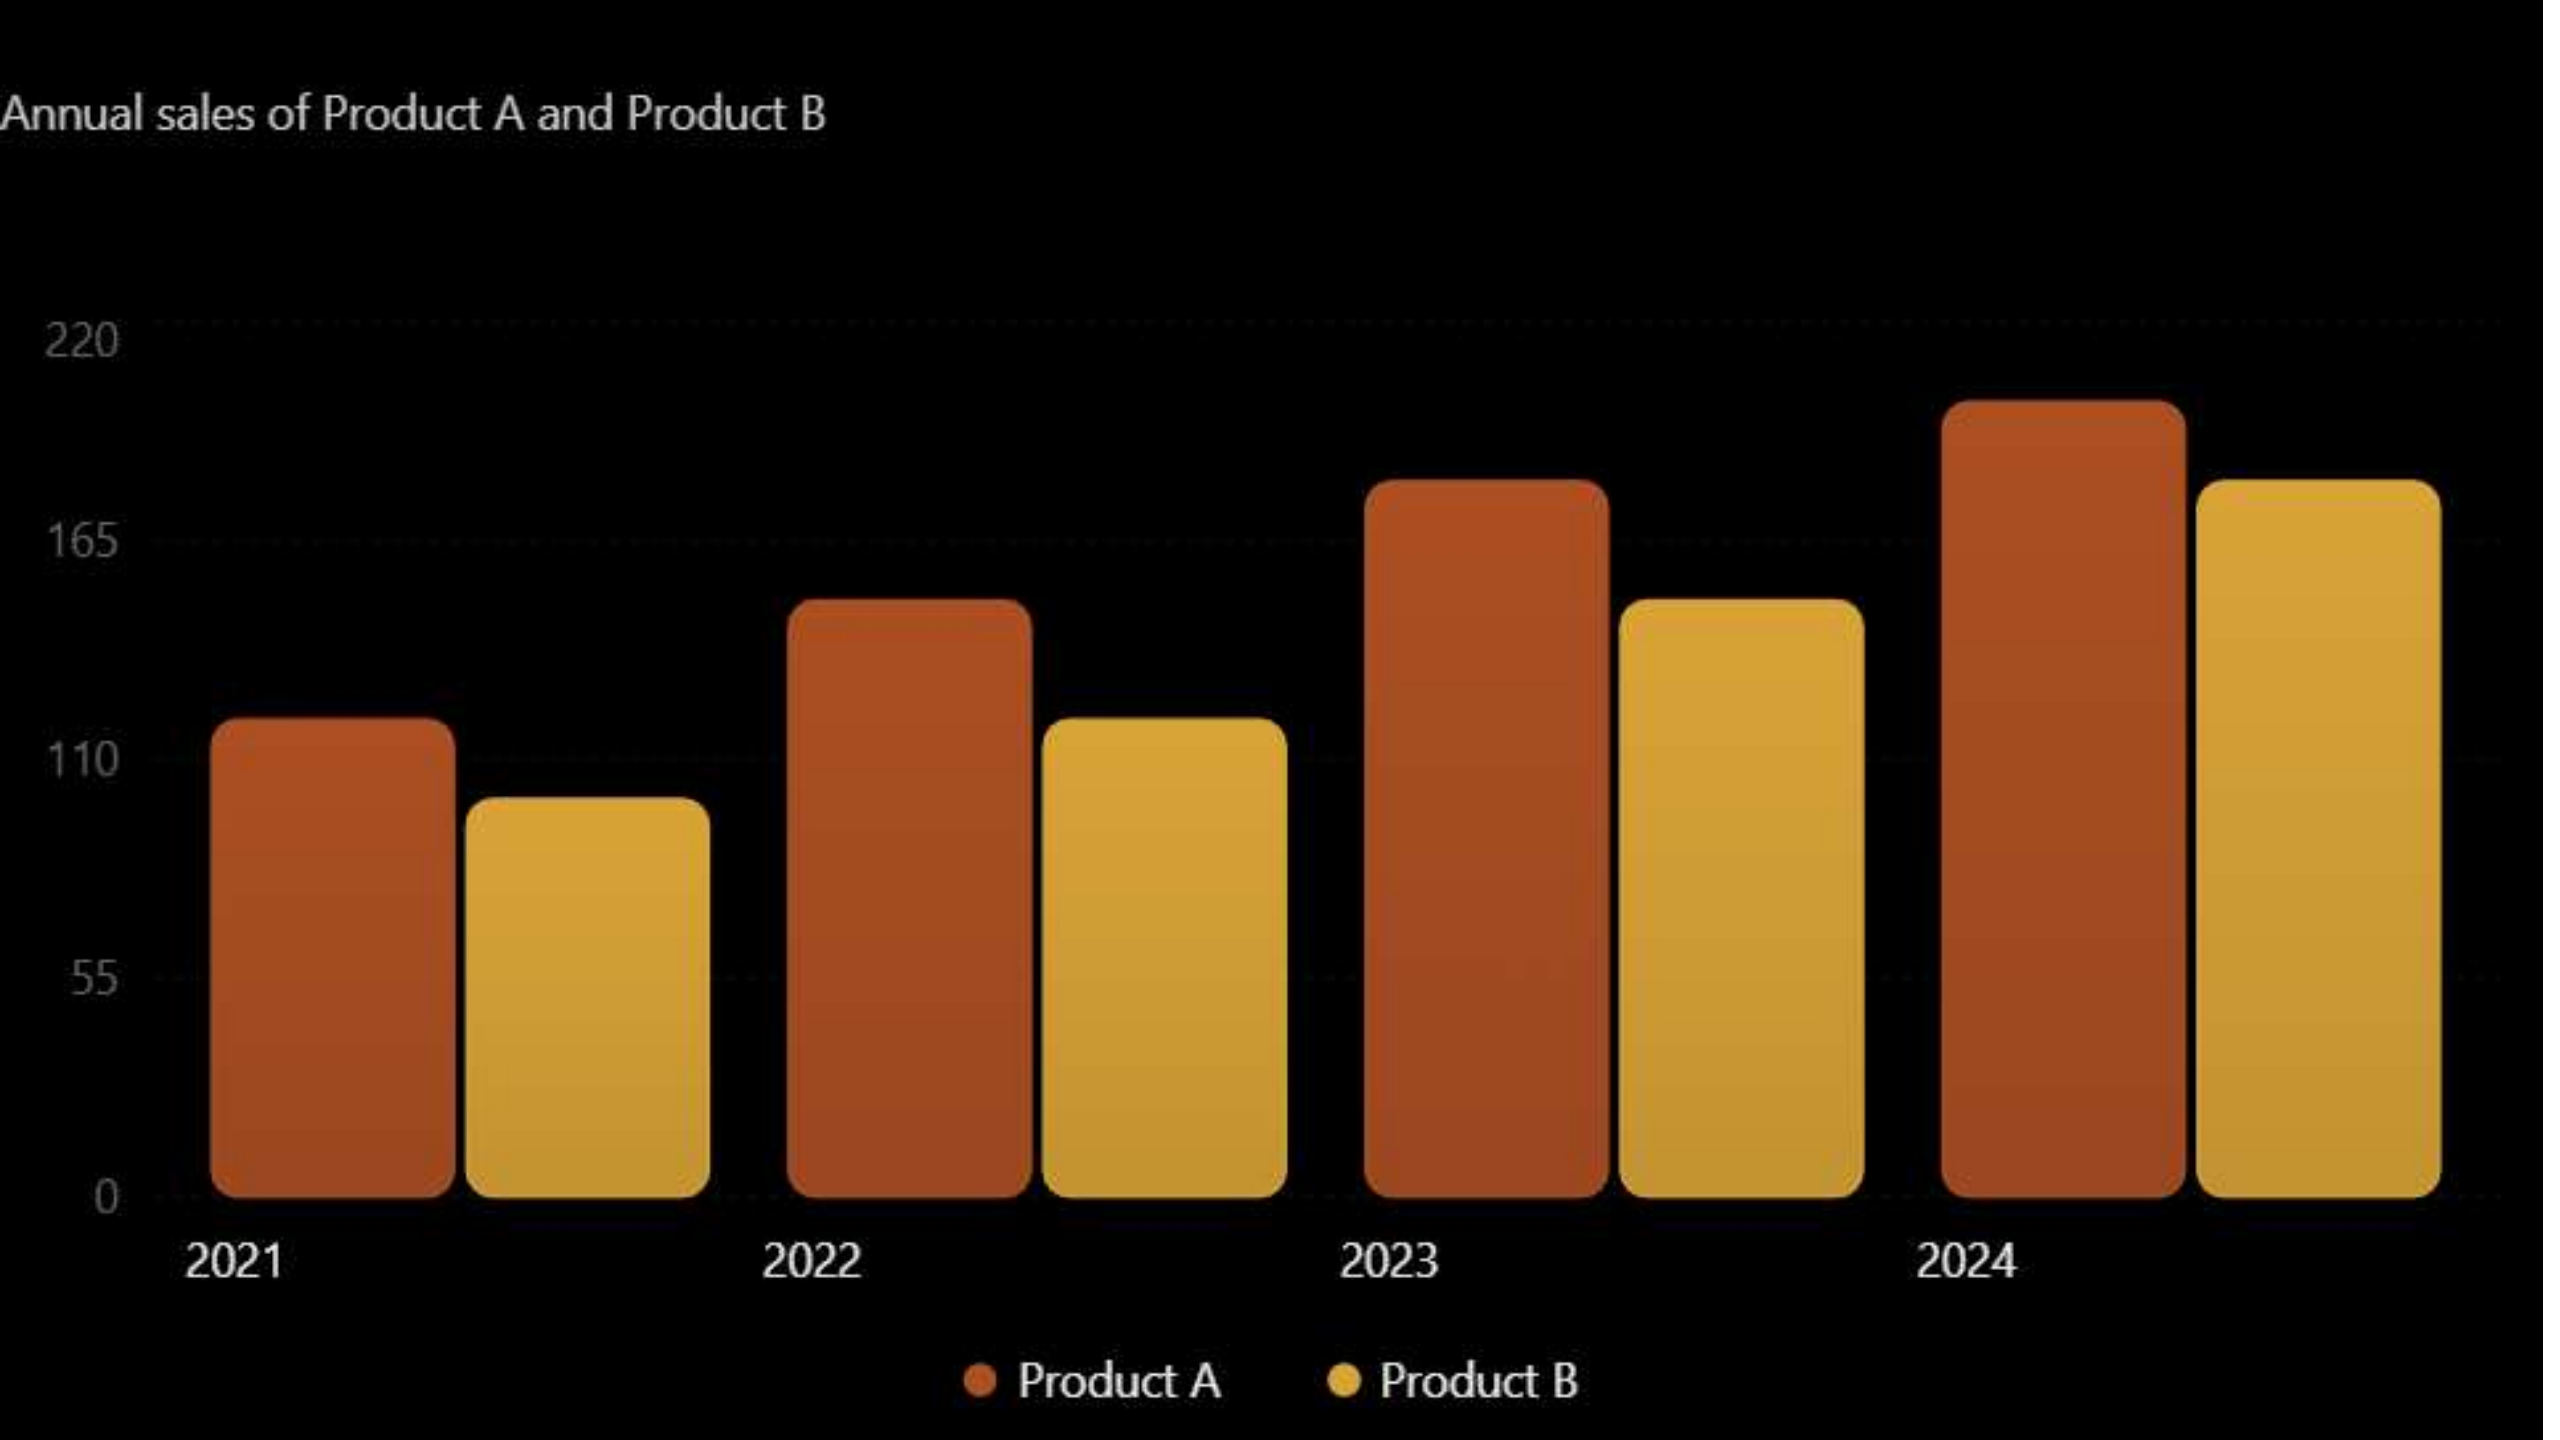

A) 2%
B) 3%
C) 4%
D) 5%

Data Interpretation – Part 2

1. Mixed Graphs

The following data represents the sales of two products, A and B, by a company over four years.

Year	Product A	Product B
2021	120	100
2022	150	120
2023	180	150
2024	200	180

Annual sales of Product A and Product B
220
165
110
55
0
2021
2022
2023
2024
Product A
Product B

Q1. What is the total sales of both products in 2023 and 2024?

A) 680

B) 700

C) 710

D) 730

Q2. What is the percentage increase in Product B sales from 2021 to 2024?

A) 60%

B) 70%

C) 80%

D) 90%

Q3. What is the ratio of total Product A sales to total Product B sales over all four years?

A) 13 : 11

B) 67 : 55

C) 12 : 10

D) 15 : 13

Q4. In which year was the percentage difference between Product A and Product B sales the highest, considering Product B as the base?

A) 2021
B) 2022
C) 2023
D) 2024

Q5. If the production cost per unit of Product A is ₹40 and Product B is ₹50, what is the total production cost in 2024?

A) ₹16,000

B) ₹17,000

C) ₹17,500

D) ₹18,000

2. Caselet DI –

Read the following information carefully.

A company has 500 employees working in five departments: HR, Finance, IT, Sales and Marketing.

- 20% of employees work in HR.
- 15% work in Finance.
- 30% work in IT.
- 25% work in Sales.
- The remaining employees work in Marketing.

Q1. How many employees work in the Marketing department?

A) 40

B) 50

C) 60

D) 70

Q2. What is the ratio of IT employees to Finance employees?

A) 2 : 1

B) 3 : 2

C) 5 : 3

D) 4 : 3

Q3. If 20% of the Sales employees are transferred to IT, how many employees will IT have?

A) 165
B) 170
C) 175
D) 180

Q4. What percentage of total employees work in HR and Marketing together?

A) 25%

B) 30%

C) 35%

D) 40%

Q5. If 10 new employees join HR and 20 employees leave Finance, what is the new total workforce?

A) 480

B) 490

C) 500

D) 510

3. Percentage-Based DI

A company has 800 employees.
The following information represents the percentage distribution of employees across different departments.

Department	Percentage
HR	10%
Finance	15%
IT	35%
Sales	25%
Marketing	15%

Q1. How many employees work in the IT department?

A) 260

B) 270

C) 280

D) 290

Q2. What is the difference between the number of Sales and HR employees?

A) 100
B) 110
C) 120
D) 130

Q3. If the number of IT employees increases by 10%, what will be the new number of IT employees?

A) 300

B) 308

C) 310

D) 315

Q4. What percentage of employees work in Finance and Marketing together?

A) 25%

B) 30%

C) 35%

D) 40%

Q5. If 20% of the Sales employees resign, what percentage of the original total workforce does this represent?

A) 4%

B) 5%

C) 6.25%

D) 7.5%

4. Ratio-Based DI

A company has 720 employees in three departments: Development, Testing and Support.

The ratio of employees is:

D:T:S=5:3:4

Q1. How many employees work in the Development department?

A) 280
B) 300
C) 320
D) 340

Q2. What is the difference between Development and Testing employees?

A) 100
B) 110
C) 120
D) 130

Q3. If 30 employees are transferred from Development to Support, what is the new ratio?

A) 9 : 3 : 6

B) 4.5 : 3 : 4.5

C) 3 : 2 : 3

D) 5 : 4 : 3

Q4. If 20% of Testing employees are women, how many men work in Testing?

A) 120

B) 135

C) 144

D) 150

Q5. If 60 new employees join Support, what will be the new ratio of Development, Testing and Support?

A) 5 : 3 : 5

B) 5 : 4 : 5

C) 5 : 3 : 6

D) 6 : 3 : 5

5. Data Comparison

The following table represents the annual revenue and expenditure of four companies.

AMOUNTS IN ₹ LAKHS

Company	Revenue	Expenditure
A	500	350
B	600	420
C	450	300
D	700	560

Q1. Which company has the highest profit?

A) Company A
B) Company B
C) Company C
D) Company D

Q2. Which company has the highest profit percentage based on expenditure?

A) Company A
B) Company B
C) Company C
D) Company D

Q3. What is the difference between the total revenue of Companies B and D?

A) ₹50 lakhs

B) ₹75 lakhs

C) ₹100 lakhs

D) ₹125 lakhs

Q4. What is the ratio of the combined profit of Companies A and C to the combined profit of Companies B and D?

A) 25 : 27

B) 30 : 33

C) 15 : 16

D) 20 : 21

Q5. If the revenue of Company A increases by 20% and its expenditure remains unchanged, what is its new profit?

A) ₹200 lakhs

B) ₹220 lakhs

C) ₹250 lakhs

D) ₹270 lakhs
