RAISETECH

JAVA

— FULL STACK WITH —

AI • DSA • AWS • REACTJS

Master Java Full Stack Development with industry-relevant skills and real-world projects.

BUILD
Strong Concepts & Scalable Apps

INNOVATE
Solve Problems & Create Solutions

DEPLOY
Launch, Scale & Make an Impact

WHAT YOU WILL MASTER

Java | DSA | Database | React JS | SpringBoot | Rest API | Micro Services | AWS | Spring AI

WHAT YOU'LL BUILD

- E-commerce Platform
- AI-Powered Chat Application
- Task Management System
- Blog / Content Management System
- Real-time Collaboration App
- Cloud-Ready Scalable Applications

AI INTEGRATION
Add intelligence to your apps using AI & ML APIs

RAISETECH

Talents Core and advanced Java course is aligned to Industry standards developed by leading Java Experts. This course aims to make you master all the Core and Advanced level skills in the Java and various technologies involved in the field of Java.

Fullstack

COURSE DURATION	SESSION HOURS
150 DAYS	450 HOURS

KEY HIGHLIGHTS

- Only EdTech with 100% internship based and job guarantee training.
- Institute backed by strong IIT alumni team.
- More than 10,000+ success stories created.
- Partnered and serving 100+ clients right from the inception of the firm.
- Parent company Quality Thought No #1 providing placements since 2010.
- Experienced IT Architects, subject matter experts as advisory in the board.
- Guaranteed Internship Opportunity 3 to 6 Month(s) for every participant.
- Backed by strong internal human resource team enabling quick placements.
- Special guidance to students to win jobs with highest packages.

TRAINING HIGHLIGHTS

- Industry ready course roster designed by architects and subject matter experts.
- Proven content, creating gateway to world of job opportunities.
- Practical & detailed approach, everyone can understand and perform to exc
- Subject matter experts as trainers.
- Not just learning, Learn by doing methodology.
- Access to instant recorded live class videos shared.
- Personalized attention and guidance to accelerate the learning.
- Member to private group to get instant doubt clarifications.
- Guest lectures from leading MNC Companies.

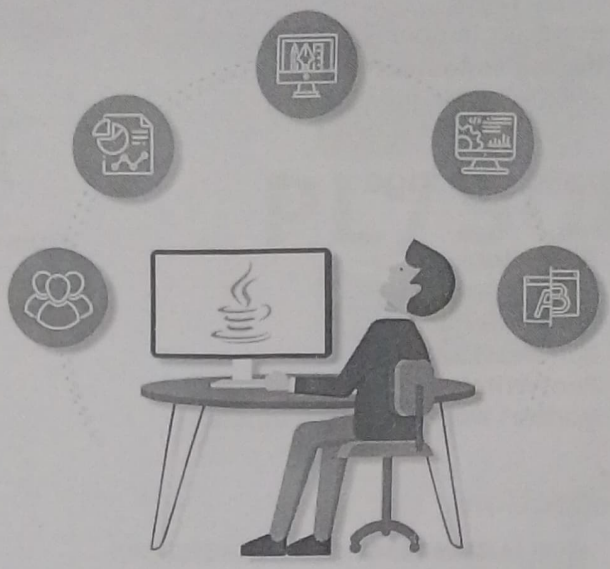

96422 10326

#304, 3rd floor, Nilgiri Block
Beside Metro station, Ameerpet, Hyderabad

Core Java

a) Basic Introduction of Java

- Programming Language
- Modules In Java
- History of Java
- Internal Architecture of JVM
- Naming Conventions
- Identifiers
- Reserved Words
- Data-types
- Types of variables
- var-arg method
- Main method
- System.out.println()
- Command line arguments
- Java Source File Structure
- Types of Blocks in Java
- Type casting in Java
- Fully Qualified Name
- Import Statements
- Control-Statements
- Arrays

b) OOPS

- class
- object
- Data Hiding
- Abstraction
- Encapsulation
- Is-A relationship
- Has-A relationship
- Types of Inheritance
- Method Overloading
- Method Overriding
- Method Hiding
- Polymorphism
- Constructors
- this keyword
- super keyword
- Interfaces
- Abstract classes
- Wrapper classes
- What is API?
- Packages
- Enum
- Inner classes
- String
- StringBuffer
- StringBuilder
- StringTokenizer

c) Exception Handling

- Exception vs Error
- Types of Terminations
- Exceptions Hierarchies
- try block
- catch block
- finally block
- throw statement
- throws statement
- custom exceptions in java

d) java.io package

- File
- FileWriter
- FileReader
- BufferedWriter
- BufferedReader
- PrintWriter
- Various ways to provide inputs

e) Collections

- What is Collection?
- List Interface
- Set Interface
- Map Interface
- Types of cursors in Java

f) Multi-Threading

- Thread vs Process
- Multi-Tasking
- Multi-Threading
- Ways to start a thread in java
- Setting and Getting name of a thread
- Thread priority
- Various methods to prevent a thread from executio
- Daemon Thread
- Synchronization
- Types of synchronization
- Inter-Thread communication
- DeadLock in Java

g) Java 1.8 Features

- Functional Interface
- Lambda Expression
- java.time package
- default and static methods in interface
- Stream API

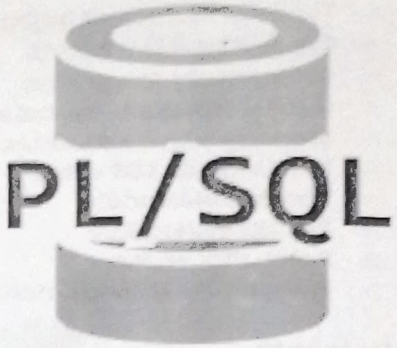

96422 10326

#304, 3rd floor, Nilgiri Block
Beside Metro station, Ameerpet, Hyderabad

Oracle

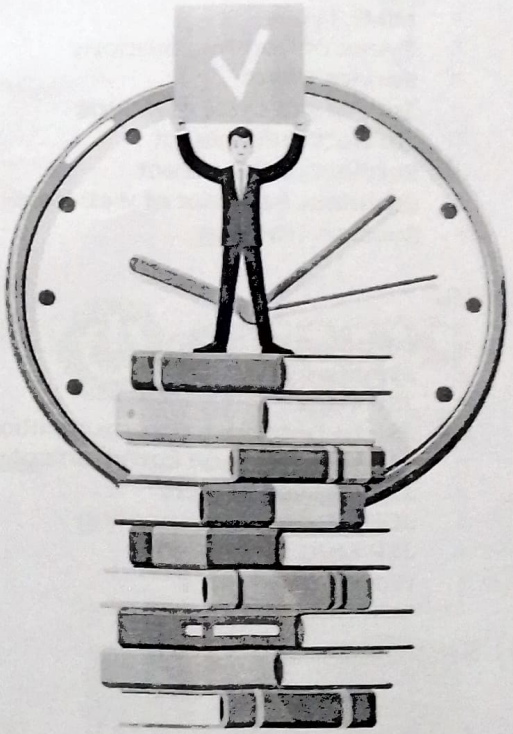

a) SQL

- Types of Data
- Introduction to Oracle
- Tables, DBMS, RDBMS
- DDL commands
- DML commands
- DRL commands
- DML commands with where clause
- TCL commands
- DCL commands
- Operators in SQL
- Group by, Having and order by clause
- Integrity constraints
- Types of constraints
- Joins
- Sub Queries
- Sequences
- Synonyms
- Pseudo columns
- Indexes

b) PL/SQL

- Introduction to PL/SQL
- Control statements in PL/SQL
- LOOPS in PL/SQL
- SQL operations in PL/SQL
- DML operations in PL/SQL
- Exception Handling
- Cursors
- Procedures
- Functions
- Packages
- Triggers

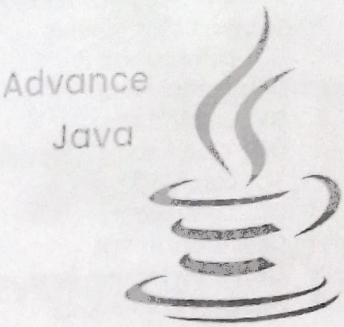

96422 10326

#304, 3rd floor, Nilgiri Block
Beside Metro station, Ameerpet, Hyderabad

Advanced Java

a) JDBC

- Introduction to JDBC
- JDBC Drivers Architectures
- Files vs Database
- Connection object
- Types of Statement objects
- Types ResultSet objects
- Select query executions
- Non-select query executions
- Working with Date values
- Working with LOB values
- DatabaseMetadata
- ResultSetMetaData
- Batch Processing
- Transaction Management

b) Servlets

- What is web application?
- What is web resource program?
- What is web container?
- Sample web application creation
- Types of url patterns
- MIME Types
- Types of Communications
- Servlet Filters
- Servlet Life cycle methods
- ServletConfig object
- ServletContext object
- Stateless Behavior of web application
- Session Tracking

c) JSP

- Introduction to JSP
- JSP life cycle
- JSP Tags
- JSP to Database communication
- JSP to Java Bean communication
- JSP implicit objects
- JDBC Connection pooling
- JSP MVC Architecture
- Working with IDE's

d) Servers

- Tomcat Server
- Web Logic Server

96422 10326

#304, 3rd floor, Nilgiri Block
Beside Metro station, Ameerpet, Hyderabad.

e) IDE's

- Eclipse
- NetBeans

f) Real tools

- GIT/GITHUB
- Maven/Gradle
- Junit

g) SDLC

- What is SDLC
- Types of phases in SDLC

h) Project

- Module 1
- Module 2

Java Frameworks: Spring Boot

1. Introduction

- Introduction
- Limitations with Spring Framework
- IOC Container
- Dependency Injection
- Types of Dependency Injection
- What is Spring Boot
- Advantages of Spring Boot
- Components of Spring Boot
- Spring Initializer
- First Spring Boot Application Development
- @SpringBootApplication Annotation
- Spring Boot Starter
- Spring vs Spring Boot

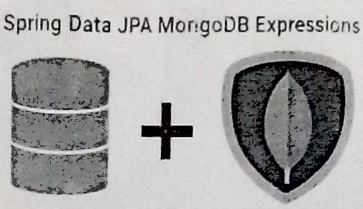

2. Spring Web

- Introduction to Spring Web
- Web Application Development
- application.properties File
- Web Annotations
- Spring Boot Thymeleaf
- Spring Boot Thymeleaf to Interact with H2 Database

3. Spring Data JPA

- Introduction to Spring Data JPA
- Types of Repositories
- Spring Boot Flow Layered Architecture
- Spring Boot Application to Interact with H2 Databa
- @RestController
- @Controller vs @RestController
- Reading Data from Properties File

96422 10326

#304, 3rd floor, Nilgiri Block
Beside Metro station, Ameerpet, Hyderabad

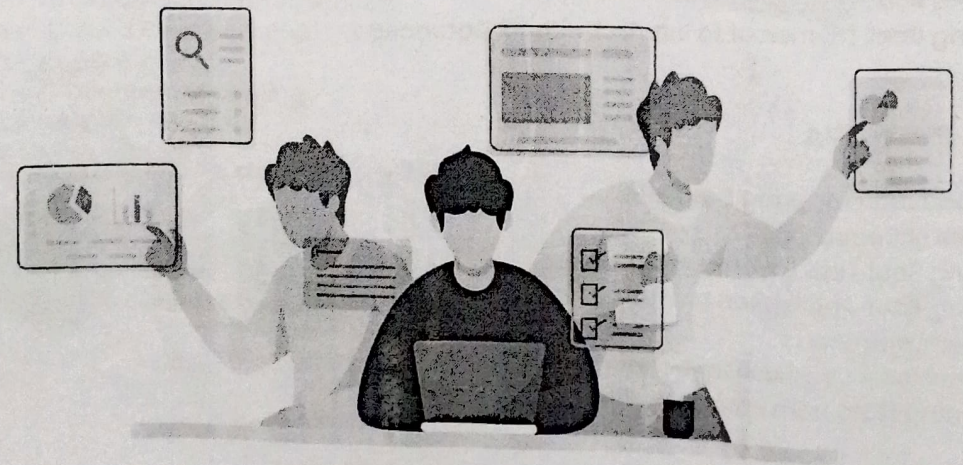

Microservices

1. Introduction

- Monolithic Architecture vs Microservice Architecture
- What is Microservice
- Project Lombok

2. Microservice

- HTTP Methods
  - GET
  - POST
  - PUT
  - DELETE
  - PATCH
- Exception Handling
- Custom Queries in Spring Boot
- Spring Boot Actuator
- Eureka Server
- Spring Cloud API Gateway
- Types of APIs
- API Validation
- Spring Cloud Hystrix
- Communicating with Multiple Database Software
- Rest Template
- Feign Client
- Unit Testing using Mockito
- POSTMAN Tool
- Load Balancer
- Spring Boot Cache

96422 10326

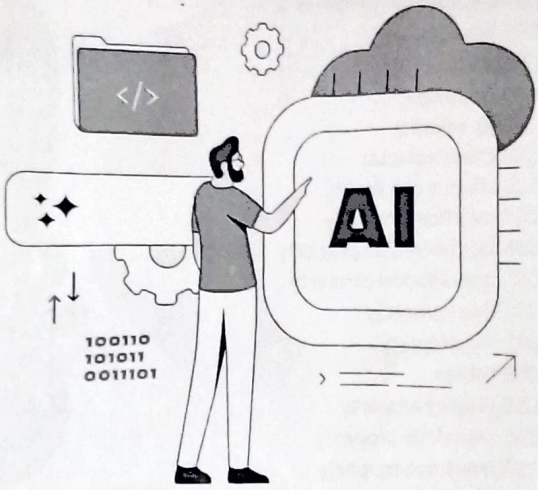

#304, 3rd floor, Nilgiri Block
Beside Metro station, Ameerpet, Hyderabad,

3. Spring Security

- What is Spring Security
- Authentication
- Authorization
- Building First Spring Security Application
- Building Authentication-Based Application

Spring AI

1. Introduction

- What is AI
- Types of AI
- AI vs ML vs DL vs Generative AI
- Real-time AI Applications
- What is Spring AI
- OpenAI
- Chatbot Application using OpenAI
- Text to Image using OpenAI
- Text to Audio using OpenAI

Web Development

HTML-5

a) Introduction

- What is HTML5?
- Types of Search Engines?
- What web page?
- Comments in Java
- HTML Basic Tags
- HTML Colors
- HTML Tables
- HTML forms
- HTML datalist Tag
- <iframe> tag
- HTML Video
- Graphics in HTML
- HTML Layouts
- Types of Browsers?
- What is Web site?
- Simple HTML skeleton program
- HTML5 Meta Tags
- Phrase Tags in Html5
- HTML images
- List in HTML
- Block Elements vs Inline Elements
- GET vs POST methodology
- Frames
- HTML Audio

b) Editors

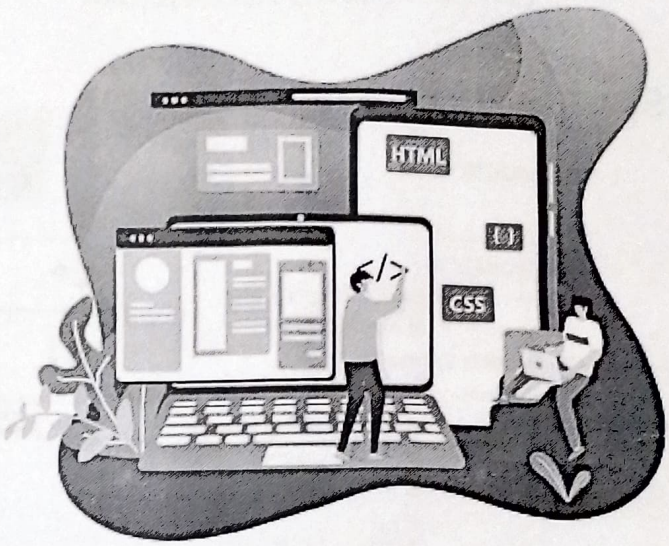

- NotePad
- NotePad++

9642210326

CSS-3

a) Introduction

- What is CSS?
- Types of CSS?
- CSS background property
- CSS borders
- CSS margins
- CSS paddings
- CSS ID selector
- CSS Class selector
- CSS Height and Width
- CSS overflow property
- CSS border-radius property
- CSS box-shadow property
- CSS float property
- CSS list property
- CSS tables
- CSS display property
- CSS transform property
- CSS transition property
- CSS position property

b) CSS Design Work

- CSS Design 1
- CSS Design 2
- CSS Design 3

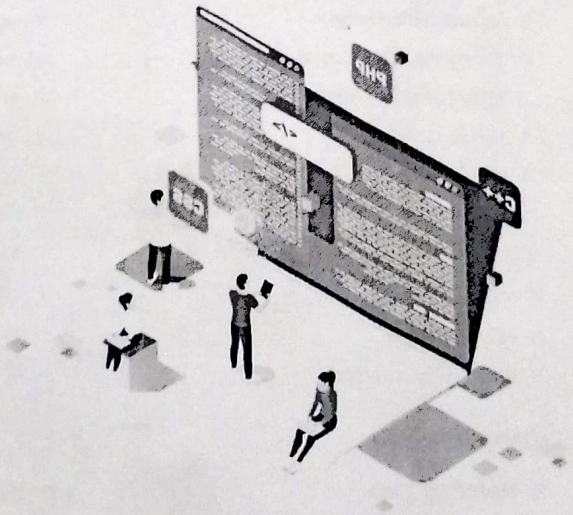

c) Editors

- Sublime

Java Script

a) Introduction

- Introduction to JavaScript
- Types of JavaScript
- JavaScript variables
- JavaScript strings
- JavaScript operators
- JavaScript validation
- JavaScript loops
- JavaScript arrays
- JavaScript functions
- JavaScript events
- JavaScript form validation
- JavaScript regular expression

96422 10326

#304, 3rd floor, Nilgiri Block
Beside Metro station, Ameerpet, Hyderabad

b) Editor

- VSC (Visual Studio Code)

c) Task

- Task 1
- Task 2
- Task 3

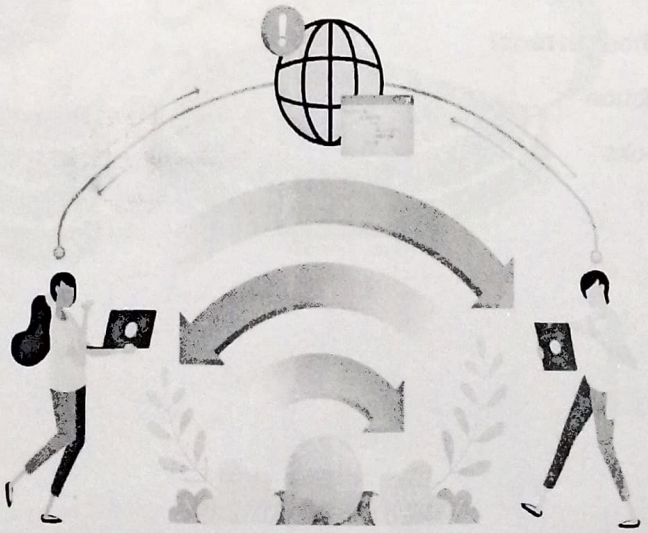

Bootstap-4

a) Introduction

- What is Bootstrap
- Advantages of Bootstrap
- Bootstrap buttons
- Bootstrap alerts
- Bootstrap badges
- Bootstrap dropdown
- Bootstrap grid system
- Bootstrap navbar
- Bootstrap tables
- Bootstrap cards
- Bootstrap forms
- Bootstrap pagination
- Bootstrap progress bar
- Bootstrap carousel

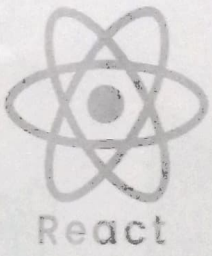

b) Design

- Designs 1
- Designs 2
- Designs 3

React/ ReactJS

- React Introduction
- Advantages of React
- JSX Introduction
- Expressions in JSX
- JSX elements
- React virtual DOM
- First application development in react
- React project structure explanation
- React Fragment
- Components in React
- Function component vs Class component
- Props
- State
- Composing component
- CSS in React
- Type checking in props
- ReactJS vs React Native
- ReactJS vs AngularJS
- Event Handing in React
- Update state using event handling
- Phases of components in react
- Life cycle methods in react
- Hooks introduction
- Predefined hooks
- Custom hooks
- React Router
- Lists in React
- Key in React
- Assets in React
- Bootstrap in React
- React Forms
- Axios
- ReactJS + NodeJS + MYSQL database integration
- React Redux

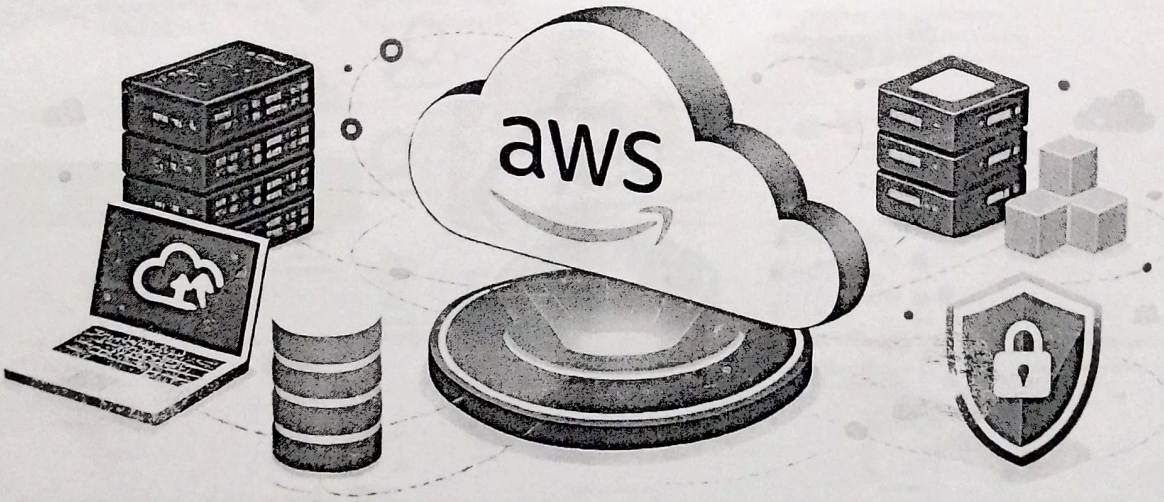

96422 10326

#304, 3rd floor, Nilgiri Block
Beside Metro station, Ameerpet, Hyderabad.

AWS – Amazon Web Services

- Types of Applications
- PC vs Server
- Need of Cloud Infrastructure
- What is Cloud Computing
- What is AWS? And Why to choose AWS
- How to create an account in AWS
- What an Operating System and its types
- Importance of Linux in Cloud Environment
- How to create a Linux server in AWS
- Putty vs Xshell
- AWS EC2 Instance
- Types of instances in AWS
- AWS Tenancy
- AWS Launch Template
- AWS EBS volumes
- Need of Elastic IP Address
- AWS RDS service for JDBC Application?
- How to deploy web application in
- AWS Elastic Bean Stalk
- AWS S3 service
- How to deploy spring boot application in AWS Cloud

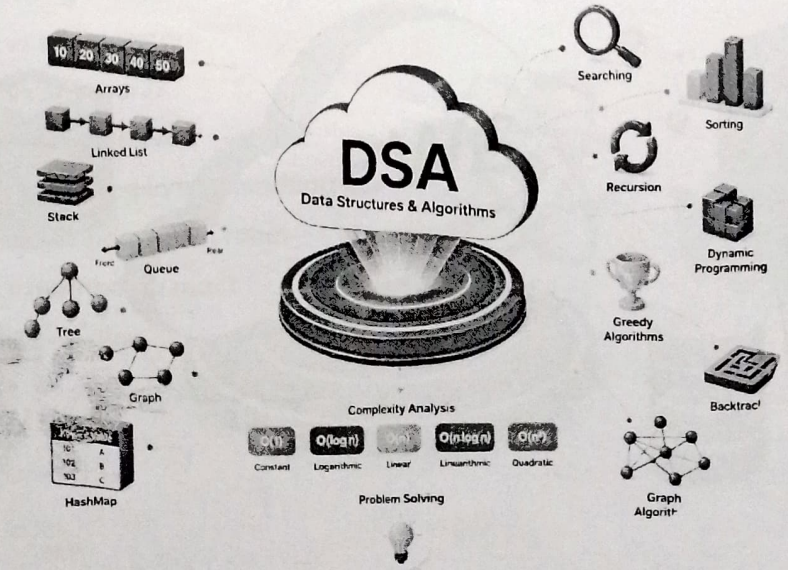

96422 10326

#304, 3rd floor, Nilgiri Block
Beside Metro station, Ameerpet, Hyderabad

RAISETECH

DSA (Data Structure & Algorithm)

1. Introduction
   - What is Data
   - What is Data Structure
   - Types of Data Structures
   - Pseudo Code
   - Flow Chart
   - Time complexity
   - Space complexity
2. Searching
   - Linear Search
   - Binary Search
3. Dynamic Programming
   - Recursion
   - LCS Longest Common Subsequence
   - Interview Programs
4. Sorting
   - Bubble Sort
   - Selection Sort
   - Insertion Sort
   - Divide and Conquer
   - Quick sort
   - Merge Sort
5. LinkedList
   - What is LinkedList
   - Singular LinkedList
   - Doubly LinkedList
   - Circular LinkedList
6. Stack and Queue
   - Stack Implementation
   - Queue Implementation
7. Trees
   - Binary Tree
   - BST Binary Search Tree
8. Graphs
   - What is Graph
   - Types of Graphs
   - Converting directed graph to adjacent matrix
   - Converting directed graph to adjacent List
   - Depth First Search (DFS)
   - Breadth First Search (BFS)

96422 10326

RAISE TECH

FEATURED PROJECT

EMPLOYEE MANAGEMENT SYSTEM

A secure and efficient web application to manage employees, departments, attendance, leaves, and performance — all in one place.

KEY MODULES

Employee Management
Add, Update, View & Manage Employee Details

Attendance Tracking
Track Daily Attendance Records

Leave Management
Track Leave attendents with Real-Time Status

Reports & Analytics
Generate Insights and Visual Reports

Role & Access Control
Secure Role-Based Access for Users

TECH STACK

ReactJS
A JavaScript library for building fast, interactive, and responsive user interfaces.

Spring Boot
A powerful Java framework for building robust and scalable backend services.

MySQL
A reliable relational database management system for storing and managing data efficiently.

CORE FEATURES

User Authentication
Secure login & role-based access

Employee CRUD
Add, Edit, Delete and View Employee Records

Attendance Management
Mark, Update and View Attendance Records

Leave Workflow
Apply, Review and Approve Leave Requests

Dashboard & Reports
Visual Insights and Real-Time Analytics

Responsive Design
Works seamlessly on all devices

Secure & Reliable
Built with industry-standard security practices for data protection.

Fast & Scalable
Optimized performance for growing organizations.

Easy to Use
Clean and intuitive interface for smooth user experience.

Cloud Ready
Deploy anywhere with high availability and flexibility.

Modern Technology
Built using ReactJS, Spring Boot, and MySQL.

96422 10326

#304, 3rd floor, Nilgiri Block
Beside Metro station, Ameerpet, Hyderabad

RAISETECH

EMPOWERING FUTURE TECH LEADERS

At RaiseTech, we transform beginners into industry-ready professionals through practical learning, real-world projects, and expert mentorship.

WHY CHOOSE RAISETECH?

INDUSTRY RELEVANT CURRICULUM
Our curriculum is designed as per the latest industry standards.

HANDS-ON EXPERIENCE
Gain practical skills through real-time projects and assignments.

CAREER FOCUSED TRAINING
We focus on building job-ready skills and career growth.

GROW WITH CONFIDENCE
From basics to advanced, we help you grow step by step.

LEARN TODAY, LEAD TOMORROW

We bridge the gap between learning and real-world application with hands-on training and placement-focused programs.

EXPERT TRAINERS
Learn from experienced industry professionals.

PRACTICAL LEARNING
Work on real-world projects and industry case studies.

PLACEMENT SUPPORT
Resume building, mock interviews & placement assistance.

CERTIFICATION
Industry-recognized certification to boost your career.

OUR COURSES

- Java Full Stack Development
- Python Full Stack Development
- MERN Stack Development
- Data Science & Machine Learning
- Cyber Security
- Cloud Computing (AWS)
- UI/UX Design
- Data Analytics

WHAT YOU WILL LEARN

- PROGRAMMING FUNDAMENTALS
- WEB DEVELOPMENT
- DATABASE MANAGEMENT
- REAL-WORLD PROJECTS
- DEPLOYMENT & DEVOPS
